C & S Electrical Engineering Limited has carried out specialist crane wiring services worldwide. Some of our dedicated operatives have experience that spans over 25 years in this highly technical field of specialist power and control wiring. C & S Can offer its clients, full flexibility and diversity, from a complete electrical installation to modifications to existing wiring for new control systems. We offer crane disconnection to allow relocation anywhere in the world and reconnection. C & S have carried out work around the majority of ports around the UK including M.O.D. bases. We can assist in the relocation (disconnection and reconnection) of heavy duty machines for factory relocation locally or anywhere in the world.
